

SKID-MOUNTED WHOLEMEAL MAIZE FLOUR MILL - 5 T/HR

DESIGNED AND BUILT FOR UN-WFP FOR EAST AFRICA

◀ High performance hammermill with dust filtration unit.

▲ The precleaner, and flour sacking system.

Operating in simple warehouse - the plant is shipped 90% pre-erected and 100% pre-wired on the skid frame inside a 40ft HC container. ▶

DESIGNED AND BUILT FOR UN-WFP FOR EAST AFRICA

▼ Operating the plant - maize is tipped into the reception hopper to the right and flour is bagged via the automatic weigher with stitching track.

▲ The control panel and close up of the filter unit.
